Save The Date! Nutrition, Nutrigenomics and Prevention

Jill James PhD, Michael Fenech PhD, CSIRO Sydney, July 31, 2010

Neurobiological disorders are at epidemic levels. Best outcomes lie in teams of trained health professionals and educated carers.

Carer Education

For Parents, Teachers, Psychologists, Occupational Therapists and Social Workers

Would you ask a child with a broken leg to run faster? Asking a child with ADHD, learning delay, Autism or even allergies to sit still or study harder is equivalent if there is an underlying medical condition.

Medical research indicates that a range of illnesses are linked by overlapping **Metabolic, Immuno, Neuro & Digestive Disorders**. Addressing underlying causes can improve health, behaviour and concentration while reducing the need for medications and the risk of disease. Selecting and sequencing appropriate treatments is essential for best outcomes and saves time and money.

Practitioners Training

For Doctors, Chiropractors, Naturopaths and Nutritionists

Best treatment outcomes lie in a team of well-trained practitioners who understand how to take histories, read symptoms, run tests and effectively treat the gut (permeability, dysbiosis, inflammation, biofilms) and metabolism (genetic polymorphisms, nutritional deficiencies, mitochondrial dysfunction, impaired detoxification, oxidative stress, chronic inflammation, cerebral hypoxia and impaired energy production).

Participating practitioners will be listed on the new Mindd website.

Speakers; *Dr. R Stuckey, Dr. N Avard, Dr. L Thomas, Dr. S Bode, Dr. J Turtle, Dr. A Underwood, Dr. R Cosford, Dr. B Rabinov, Dr. M Dyson and local Practitioners.*
